

ISPN Global Psychiatric Mental Health Nursing: Community-Based Research Grant

Proposal Guidelines

Limited to 5 pages (single spaced, 12 font). This limit does not include the references, budget, or appendices.

Must include:

1. Cover page Include your name, address, phone number, e-mail, and ISPN membership division.
Provide the same information for all co-investigators (however, only the PI needs to be a member of ISPN). If you are a student, please include faculty advisor(s) information.
2. Introduction/problem statement: Describe the problem that led to the study with mothers and their offspring. State concisely the importance of research in terms of the contribution to psychiatric nursing.
3. Background literature review and theoretical/conceptual framework present a synthesis of the background literature for the proposal. Include current literature that is directly pertinent to the project and that assists in clarification of purpose and procedures. Critically evaluate existing knowledge. Specify the gaps that the project is intended to fill. Summarize the theoretical framework or rationale as appropriate.
4. Purpose and aims: State clearly the overall purpose and the specific aims or research questions of the study. Provide hypotheses.
5. Methods
 - a. Research design: Describe the design of the research.
 - b. Subjects and setting: Describe the target population and characteristics of the subjects. Include the number of subjects (dyadic subjects: mothers and their offspring), the rationale for sample size (including power analysis if applicable), the sampling procedure, and the setting for data collection.
 - c. Instruments/Measures: Report the specific characteristics of the instruments or measures, including their reliability, validity, and/or sensitivity. Address how the tool will be used. The instrument(s) should be included in an appendix.

- d. Procedure: Describe the procedures that will be used to accomplish the specific aims of the research project. Give details of the (preventative) intervention if one is proposed. Specify the type of data you expect to obtain. Describe how the data will be collected, managed, and analyzed. Include relevant information regarding protection of human subjects.
6. References (not included in 5-page limit): Format references in accordance with the Publication Manual of the American Psychological Association 7th edition (APA). Provide sufficient references to support proposal. Use current and classic relevant references appropriate in maternal and child mental health field.
7. **Appendices** (not included in 5-page limit)
 - a. Budget with justification - Provide specific budget for expenses along with justifications. Only expenses essential to the conduct of the proposed research will be considered for funding. Salary support is not allowed.
 - b. Timeline - Provide a 12–24-month schedule that specifies the timing of the main steps of the investigation. Justify that the research project can be completed within the time frame.
 - c. Copies of paper/pencil instrument(s), interview guide, or other instruments as applicable
 - d. Status of IRB or equivalent approval - Include a copy of the Institutional Review Board (IRB) approval or status, or statement regarding IRB approval if pending or equivalent.
 - e. Environment – Describe available resources and research environment to support this examination.
 - f. Collaborative arrangements and consultative support - If the proposed research requires collaboration with other institutions, describe the nature of collaboration and provide evidence (letters of support) that those institutions are willing to cooperate. Include a description of availability of adequate consultation to assure refinement and completion of the research project and include letters from any consultants or research advisors/mentors.
 - g. Letter(s) of Support - At least one letter of support attesting to your ability to carry out the proposed (preventative) intervention research, available resources, and feasibility of the project. This may include:
 - Letter of support from an institutional colleague that addresses your ability to carry out proposed research, available resources and/or feasibility of the project

- Letter of support from thesis/dissertation chair if applicable (must be included if applicant is a graduate student)
- Letter of support from any collaborating institutions or organizations if applicable
- Letter from any consultants if applicable
