

Third Annual ISPN Psychopharmacology Institute

April 13-14, 2010 • Hyatt Regency Hotel at the Arch • St. Louis, Missouri

Introduction

The 2010 ISPN Psychopharmacology Institute is fast approaching, so get out those schedulers and don't miss this event being held April 13 and 14 in St. Louis! The content has been carefully chosen based on the feedback from ISPN members and from all the participants that attended the Second ISPN Psychopharmacology Institute. The Psychopharmacology Institute Planning Committee has worked diligently over the last year to respond to your ideas for topic areas and recommended speakers. The upcoming program will be introducing the Susan McCabe Lectureship, as the keynote of the Psychopharmacology Institute. Dr. McCabe was known for her groundbreaking and adventurous thinking that always made her presentations titillating and visionary. We are very fortunate to honor Dr. McCabe by having such an eloquent nurse as Dr. Mary Weber launch this lectureship.

The content is diverse and addresses patients across the age spectrum and prescribing issues related to varying practice settings. During the Institute there is a specific session focused on seeking out consultation from a panel of experts that is now divided into two prescribing panels, child/adolescent focused and adult/geriatric and consultation/liason focused. This is a time for you to be actively involved in the learning process by sharing one of your particularly challenging clinical cases for panel and audience discussion.

The Psychopharmacology Institute is designed to be interactive and assist you in developing partnerships that will last far beyond the two days of the Institute. You will have opportunities to network with advance practice colleagues, establish new relationships and interact with the presenters. We actively encourage our student participants to continue their course of education into real time practice and establish connections with experienced prescribing APRN's.

We hope that you take every opportunity to make this educational event a positive learning experience. So mark those calendars and start preparing for the ISPN Psychopharmacology Institute in 2010!

Best regards,

Susan Krupnick, MSN, PMHCNS-BC, ANP-BC, CARN
Co-Director of ISPN Psychopharmacology Institute

Evelyn Parrish, PhD, RN, APRN
Co-Director of ISPN Psychopharmacology Institute

Psychopharmacology Institute Objectives

This course has been designed so that the participants will be able to:

- Describe new and comprehensive knowledge regarding the psychopharmacologic treatment of major psychiatric, substance abuse disorders, along with other co-morbidities across the life span; which will include antidepressants, antipsychotics, mood stabilizers, psychostimulants and addiction pharmacology.
- Discuss the emerging knowledge of pharmacogenomics and pharmacoconomics and the importance of this information in the practice of prescribing psychopharmacologic agents.
- Explore new and comprehensive knowledge associated with the integration of psychopharmacology prescribing into clinical practice, across the life span, and in varying clinical practice settings.
- Identify current and future innovations and advancements in the area of psychopharmacology.
